*Dr. Canda is a Board Member of ERUS (European Association of Urology Robotic Urology Section)
**ERUS certified training centre

I had the chance of participating in the ERUS 2016 Meeting as an invited speaker and ERUS Board Member that was held on 14-16.September.2016 in Milan, Italy.

This meeting was a great success having many live robotic urological cases performed by the worldwide known experts that we watched with great interest. In addition, there were many sessions held on robotic urology with interactive discussion with the audience. ESU Courses on robotic urology were organized.

One day before the ERUS Meeting, Junior/YAU-ERUS was organized with a very attractive program. I used to be a member of the Junior/YAU-ERUS Board until last year and starting from 2016 I have been elected as ERUS Board member. I am of course still giving my full support for the Junior/YAU-ERUS group and meetings. This year, for the first time a live case was performed by one of our colleagues. Dr. N. Doumerc from France performed a wonderful case of NVB sparing RARP. I was one of the moderators of this excellent live surgery and had the chance of asking questions to Dr. Doumerc's during he performed the live case and his answers were very informative. I would like to congratulate him again for this excellent robotic surgery (Pictures 1-3).

During the Junior/YAU-ERUS, I received the 2nd best prize on robotic urology video entitled “Occurrence, recognition and repair of rectal injury during robotic radical prostatectomy” (Picture 4,5).

Picture 4.

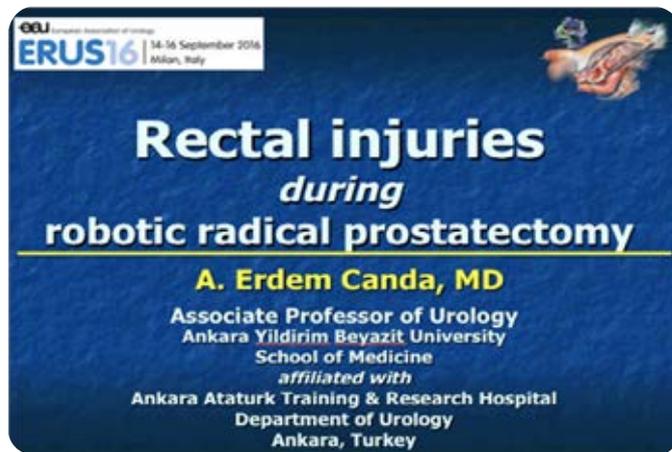

Picture 5.

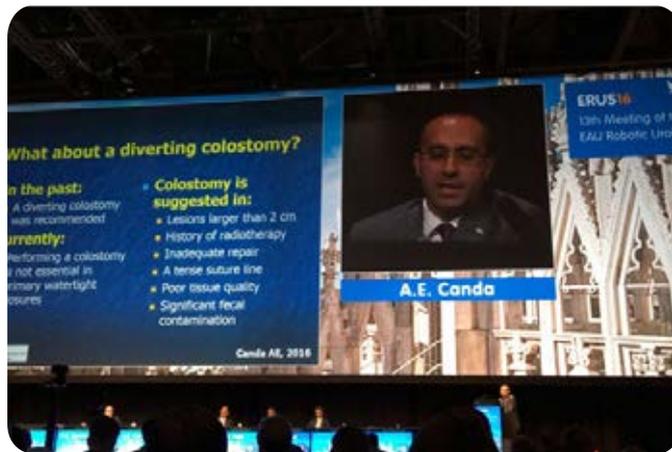

I gave the talk on “Rectal injuries during robotic radical prostatectomy” during the “Learn from the experts sessions”. During my talk, I initially presented the literature overview on this subject and thereafter presented two edited videos demonstrating how to repair rectal injuries robotically. This sessions was moderated by Dr. Vipul Patel (USA) and Dr. Mani Menon (USA) who are worldwide known experts in this field (Pictures 6-12).

We had many posters and videos during the Junior/YAU-ERUS and ERUS meeting (Pictures 13-19).

Robotic surgical videos that were included in ERUS 2016 include the followings:

**Robotic intracorporeal Studer pouch
reconstruction following robotic cystectomy**

Rectal injury during RARP

Occurrence
Recognition
Risk factors
and
Management

**Immediate Postoperative Inspection of the Prostate in
the Operating Room and Gross Pathologic
Examination & Sampling in the Pathology Laboratory
Following Robotic Radical Prostatectomy:
Important Tips**

**A posteriorly located mass lesion between
seminal vesicles identified during robotic
radical prostatectomy with an interesting
pathology: prostatic leiomyoma**

**ROBOTIC ASSISTED SACROCOLPOPEXY IN THE
SURGICAL MANAGEMENT OF PELVIC ORGAN
PROLAPSE**

**Concurrent
Robotic
Trans-abdominal pre-peritoneal (TAPP)
Inguinal herniorrhaphy
during
Robotic radical prostatectomy**
